## Difference between Genuine Parts and Non Genuine Parts

Hinopak always recommends using Hino genuine parts because Hino Genuine parts are especially design for Hino vehicles which enhances vehicle performance, reliability, durability & life of the vehicle.

### Hino Genuine Parts

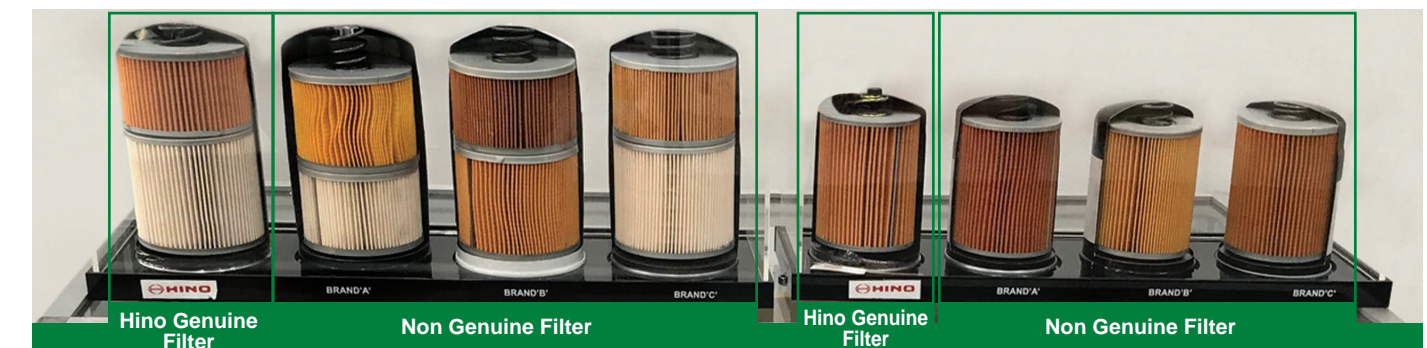

Reliable products which are developed and manufactured by Hino Motors for Hino vehicle and various operating conditions.

### Non Genuine Parts

Non Genuine Parts are developed by other companies and are not specifically for Hino vehicles. Also the quality can not be relied upon.

Non Genuine Filters can cause major damage to the engine. As a result of extra strain, reducing power and shortening vehicle life.

	Hino Genuine Parts	Non Genuine Parts
Oil Filter	<ul style="list-style-type: none"> <li>- Sufficient filtration area</li> <li>- High filtration performance</li> <li>- Designed and tested to have sufficient filtration and sealing ability</li> </ul>	<ul style="list-style-type: none"> <li>- Inefficient filtration area</li> <li>- Short life, frequent replacement</li> <li>- Poor sealing ability</li> </ul>
Fuel Filter	<ul style="list-style-type: none"> <li>- Sufficient filtration area</li> <li>- High filtration performance</li> </ul>	<ul style="list-style-type: none"> <li>- Inefficient filtration area</li> <li>- Low filtration performance</li> </ul>
Air Filter	<ul style="list-style-type: none"> <li>- Sufficient filtration area</li> <li>- No dust leakage</li> <li>- Maintains engine power</li> </ul>	<ul style="list-style-type: none"> <li>- Insufficient filtration area</li> <li>- Dust leakage</li> <li>- Inconsistent engine power</li> </ul>

**Hino Genuine Oil** is designed and formulated to meet the severe technical constraints of the turbocharged and naturally aspirated modern and older diesel engines / differential / transmission.
